Message Types

The following table lists all message types defined in this book.

For each message type, there is a short description, an indicator whether the message type requires authentication (Y/N), the maximum message length on input (2,000 or 10,000 characters), whether the use of the message requires registration with SWIFT for use in a message user group (Y) or not (N) and whether value date ordering (VDO) can be requested for the message (Y/N). Value date ordering criteria are described in the *Standards MT General Information*.

MT	MT Name	Purpose	Authen.	Max. Length	MUG	VDO
202	General Financial Institution Transfer	Requests the movement of funds between financial institutions, except if the transfer is related to an underlying customer credit transfer that was sent with the cover method, in which case the MT 202 COV must be used.	Y	10000	N	Y

MT 202 General Financial Institution Transfer

Important From Standards release 2025, additional network validated rules have been introduced for this message as part of Swift's contingency processing. Contingency processing will apply when this message is sent over FIN Financial Institution-to-Financial Institution (FI-to-FI), including those sent in FI-to-FI Member Administered Closed User Groups (MA-CUGs). Where the message passes all network validation, it will be converted to its ISO 20022 equivalent and delivered to the receiver in ISO 20022 format via the InterAct FINplus service.

These additional network validated rules can be found in the *Contingency Processing for Category 1 and 2 Payment Instruction Messages - Additional Network Validated Rules* document published in the Standards MT section of the Knowledge Centre.

Contingency processing does not apply to SCORE, Market Infrastructure Closed User Groups (MI-CUGs), and Corporate-to-Financial Institution Member Administered Closed User Groups (MA-CUGs).

Important User header block (block 3) must be present and must contain field 121 Unique End-to-end Transaction Reference (UETR). In cases where the sender is acting as intermediary and a UETR was present in the received message, the UETR must be passed, unchanged, to the next message in the transaction chain. In all other cases, a new UETR must be used. Details of the format of the user header block and field 121, and also the required order of fields in the user header block, can be found in the *FIN Operations Guide*.

MT 202 Scope

This message is sent by or on behalf of the ordering institution directly, or through correspondent(s), to the financial institution of the beneficiary institution. All parties identified in the message must be financial institutions.

It is used to order the movement of funds to the beneficiary institution.

This message may also be sent to a financial institution servicing multiple accounts for the Sender to transfer funds between these accounts. In addition it can be sent to a financial institution to debit an account of the Sender serviced by the Receiver and to credit an account, owned by the Sender at an institution specified in field 57a.

This message must not be used to order the movement of funds related to an underlying customer credit transfer that was sent with the cover method. For these payments the MT 202 COV or MT 205 COV must be used.

MT 202 Format Specifications

MT 202 General Financial Institution Transfer

Status	Tag	Field Name	Content/Options	No.
M	20	Transaction Reference Number	16x	1
M	21	Related Reference	16x	2

O	13C	Time Indication	/8c/4!n1!x4!n	3

Status	Tag	Field Name	Content/Options	No.

M	32A	Value Date, Currency Code, Amount	6!n3!a15d	4
O	52a	Ordering Institution	A, D	5
O	53a	Sender's Correspondent	A, B, D	6
O	54a	Receiver's Correspondent	A, B, D	7
O	56a	Intermediary	A, D	8
O	57a	Account With Institution	A, B, D	9
M	58a	Beneficiary Institution	A, D	10
O	72	Sender to Receiver Information	6*35x	11
M = Mandatory, O = Optional				

MT 202 Network Validated Rules

C1 If field 56a is present, then field 57a must also be present (Error code(s): C81).

MT 202 Usage Rules

- All parties to the transaction must be financial institutions.
- The transfer of funds between the ordering institution and the beneficiary institution is always related to another transaction. Field 21 must refer to this transaction.
- If the Sender wishes to instruct the Receiver to debit its account serviced by the Receiver and to credit one of its several accounts at an institution specified in field 57a, field 58A must contain the number of the account to be credited and the name of the Sender.

If the Sender wishes to instruct the Receiver that funds are to be moved between two accounts owned by the Sender and serviced by the Receiver, field 53B must specify the number of the account to be debited and field 58A the number of the account to be credited and the name of the Sender.

MT 202 Field Specifications

1. Field 20: Transaction Reference Number

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field specifies the reference assigned by the Sender to unambiguously identify the message.

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

2. Field 21: Related Reference

FORMAT

16x

PRESENCE

Mandatory

DEFINITION

This field contains a reference to the related transaction

NETWORK VALIDATED RULES

This field must not start or end with a slash '/' and must not contain two consecutive slashes '/' (Error code(s): T26).

USAGE RULES

This field will contain a reference to the related transaction which is meaningful to the beneficiary institution, for example, the common reference in an MT 300 Foreign Exchange Confirmation, field 21 of an MT 202 General Financial Institution Transfer, an MT 205 Financial Institution Transfer Execution or an MT 400 Advice of Payment.

3. Field 13C: Time Indication

FORMAT

Option C /8c/4!n1!x4!n (Code)(Time indication)(Sign)(Time offset)

PRESENCE

Optional

DEFINITION

This repetitive field specifies one or several time indication(s) related to the processing of the payment instruction.

CODES

One of the following codes may be used in Code, placed between slashes ('/').

CLSTIME	CLS Time	The time by which the funding payment must be credited, with confirmation, to the CLS Bank's account at the central bank, expressed in Central European Time (CET).
RNCTIME	Receive Time	The time at which a TARGET2 payment was credited at the receiving central bank, expressed in Central European Time (CET).
SNDTIME	Send Time	The time at which a TARGET2 payment was debited at the sending central bank, expressed in Central European Time (CET).

CODES

One of the following codes must be used in Sign (Error code(s): T15):

+	Plus	The + sign.
-	Minus	The - sign.

NETWORK VALIDATED RULES

Time indication must be a valid time expressed as HHMM (Error code(s): T38).

Time offset is expressed as 'HHMM', where the hour component, that is, 'HH', must be in the range of 00 through 13, and the minute component, that is, 'MM', must be in the range of 00 through 59. Any 'HH' or 'MM' component outside of these range checks will be disallowed (Error code(s): T16).

USAGE RULES

The time zone in which Time is expressed is to be identified by means of the offset against the UTC (Coordinated Universal Time - ISO 8601).

EXAMPLES

Assume a financial institution in London is sending a payment instruction on 5 January related to CLS in which it indicates that money has to be funded to CLS bank by 09.15 CET.

Time indication field will be completed as follows: :13C:/CLSTIME/0915+0100

Explanation:

- 0915 is the time by which the money has to be funded to CLS bank. It has been agreed that CLSTIME is to be indicated in CET (see codes above).
- +0100 is the offset of CET against UTC in January (that is during winter time).

If the same instruction had been sent on 10 June (that is during summer time), time indication field would have been completed as follows:

:13C:/CLSTIME/0915+0200

Offsets of local time zones against UTC are published in the BIC Directory download file (TZ***.txt file), which is available on www.swiftrefdata.com.

4. Field 32A: Value Date, Currency Code, Amount

FORMAT

Option A	6!n3!a15d	(Date)(Currency)(Amount)
----------	-----------	--------------------------

PRESENCE

Mandatory

DEFINITION

This field specifies the value date, currency and amount to be transferred.

NETWORK VALIDATED RULES

Date must be a valid date expressed as YYMMDD (Error code(s): T50).

Currency must be a valid ISO 4217 currency code (Error code(s): T52).

The integer part of Amount must contain at least one digit. A decimal comma is mandatory and is included in the maximum length. The number of digits following the comma must not exceed the maximum number allowed for the specified currency (Error code(s): C03, T40, T43).

The codes XAU, XAG, XPD and XPT are not allowed, as these are codes for commodities for which the category 6 commodities messages must be used (Error code(s): C08).

5. Field 52a: Ordering Institution

FORMAT

Option A	[/1!a]/[34x]	(Party Identifier)
	4!a2!a2!c[3!c]	(Identifier Code)
Option D	[/1!a]/[34x]	(Party Identifier)
	4*35x	(Name and Address)

PRESENCE

Optional

DEFINITION

This field specifies the ordering financial institution when other than the Sender of the message.

CODES

In option A, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CN	12..14n	China National Advanced Payment System (CNAPS) Code
ES	8..9n	Spanish Domestic Interbanking Code
FW	without 9 digit code	Pay by Fedwire
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
SC	6!n	UK Domestic Sort Code

CODES

In option D, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CH	6!n	CHIPS Universal Identifier
CN	12..14n	China National Advanced Payment System (CNAPS) Code
CP	4!n	CHIPS Participant Identifier
ES	8..9n	Spanish Domestic Interbanking Code
FW	9!n	Fedwire Routing Number
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
RU	9!n	Russian Central Bank Identification Code
SC	6!n	UK Domestic Sort Code
SW	3..5n	Swiss Clearing Code (BC code)
SW	6!n	Swiss Clearing Code (SIC code)

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

When the Sender of an initial MT 202 is also the ordering institution, that is, this field is not used, that Sender will be identified in this field in any subsequent messages as the ordering institution.

This field must be forwarded to the beneficiary institution.

The coded information contained in field 52a must be meaningful to the Receiver of the message.

Option A is the preferred option.

Option D should only be used when the ordering financial institution has no BIC.

6. Field 53a: Sender's Correspondent

FORMAT

Option A	[/1!a]/[34x]	(Party Identifier)
	4!a2!a2!c[3!c]	(Identifier Code)
Option B	[/1!a]/[34x]	(Party Identifier)
	[35x]	(Location)
Option D	[/1!a]/[34x]	(Party Identifier)
	4*35x	(Name and Address)

PRESENCE

Optional

DEFINITION

This field specifies the account or branch of the Sender or another financial institution through which the Sender will reimburse the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

When the Sender instructs the Receiver to transfer funds between two accounts owned by the Sender and serviced by the Receiver, this field must be used with option B to identify the account to be debited.

In those cases where there are multiple direct account relationships, in the currency of the transaction, between the Sender and the Receiver, and one of these accounts is to be used for reimbursement, the account to be credited or debited must be indicated in field 53a, using option B with the party identifier only.

If there is no direct account relationship, in the currency of the transaction, between the Sender and the Receiver (or branch of the Receiver when specified in field 54a), then field 53a must be present.

When field 53a is present and contains a branch of the Sender, the need for a cover message is dependent on the currency of the transaction, the relationship between the Sender and the Receiver and the contents of field 54a, if present.

A branch of the Receiver may appear in field 53a if the financial institution providing reimbursement is both the Sender's correspondent and a branch of the Receiver, and the Sender intends to send a cover message to the branch of the Receiver. In this case, the Receiver will be paid by its branch in field 53a.

In all other cases, when field 53a is present, a cover message, that is, MT 202/203 or equivalent non-SWIFT, must be sent to the financial institution identified in field 53a.

When field 53B is used to specify a branch city name, it must always be a branch of the Sender.

The absence of fields 53a and 54a implies that the single direct account relationship between the Sender and Receiver, in the currency of the transfer, will be used.

The use and interpretation of fields 53a and 54a is, in all cases, dictated by the currency of the transaction and the correspondent relationship between the Sender and the Receiver relative to that currency.

7. Field 54a: Receiver's Correspondent

FORMAT

Option A	[/1!a]/[34x]	(Party Identifier)
	4!a2!a2!c[3!c]	(Identifier Code)
Option B	[/1!a]/[34x]	(Party Identifier)
	[35x]	(Location)
Option D	[/1!a]/[34x]	(Party Identifier)
	4*35x	(Name and Address)

PRESENCE

Optional

DEFINITION

This field specifies the branch of the Receiver or another financial institution at which the funds will be made available to the Receiver.

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

The absence of fields 53a and/or 54a implies that the single direct account relationship between the Sender and Receiver, in the currency of the transfer, will be used.

In those cases where field 54a contains a branch of the Receiver, and is not preceded by field 53a, or field 53a contains an account of the Sender serviced by the Receiver's branch, the Receiver will claim reimbursement from its branch.

If field 54a contains a branch of the Receiver and field 53a contains a branch of the Sender, the Receiver will claim reimbursement from its branch or will be paid by its branch, depending on the currency of the transfer and the relationship between the Sender and the Receiver.

In all other cases where field 54a contains a branch of the Receiver, the Receiver will be paid by its branch in field 54a.

A branch of the Sender must not appear in field 54a.

If the branch of the Sender or other financial institution specified in field 53a is also the account servicer for the Receiver, field 54a must not be present.

Field 54a containing the name of a financial institution other than the Receiver's branch must be preceded by field 53a; the Receiver will be paid by the financial institution in field 54a.

The use and interpretation of fields 53a and 54a is in all cases dictated by the currency of the transaction and the correspondent relationship between the Sender and the Receiver relative to that currency.

8. Field 56a: Intermediary

FORMAT

Option A	[/1!a]/[34x]	(Party Identifier)
	4!a2!a2!c[3!c]	(Identifier Code)
Option D	[/1!a]/[34x]	(Party Identifier)
	4*35x	(Name and Address)

PRESENCE

Optional

DEFINITION

This field specifies the financial institution through which the transaction must pass to reach the account with institution.

CODES

In option A, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CN	12..14n	China National Advanced Payment System (CNAPS) Code
ES	8..9n	Spanish Domestic Interbanking Code
FW	without 9 digit code	Pay by Fedwire
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
RT		Pay by Real Time Gross Settlement
SC	6!n	UK Domestic Sort Code
ZA	6!n	South African National Clearing Code

CODES

In option D, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CH	6!n	CHIPS Universal Identifier
CN	12..14n	China National Advanced Payment System (CNAPS) Code
CP	4!n	CHIPS Participant Identifier
ES	8..9n	Spanish Domestic Interbanking Code
FW	9!n	Fedwire Routing Number
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
RT		Pay by Real Time Gross Settlement
RU	9!n	Russian Central Bank Identification Code
SC	6!n	UK Domestic Sort Code
SW	3..5n	Swiss Clearing Code (BC code)
SW	6!n	Swiss Clearing Code (SIC code)
ZA	6!n	South African National Clearing Code

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

When one of the codes //FW (with or without the 9-digit number), //AU, //CP, //IN or //RT is used, it should appear only once and in the first of the fields 56a, 57a and 58a of the payment instruction.

When it is necessary that an incoming SWIFT payment be made to the party in this field via Fedwire, US banks require that the code //FW appears in the optional Party Identifier.

When it is necessary that an incoming SWIFT payment be made to the party in this field via real-time gross settlement (RTGS), the code //RT should appear in the optional Party Identifier.

The code //RT is binding for the Receiver. If it is used with option A, it must not be followed by any other information. If it is used with option D, it may be followed by another domestic clearing code.

Option A must be used whenever possible.

Option D must only be used in exceptional circumstances: when the party cannot be identified by a financial institution BIC, when there is a need to be able to specify a name and address, for example, due to regulatory considerations or when there is a bilateral agreement between the Sender and the Receiver permitting its use.

When qualified by a clearing system code or an account number, the use of option D will enable the automated processing of the instruction(s) by the Receiver.

9. Field 57a: Account With Institution

FORMAT

Option A	[/1!a]/[34x]	(Party Identifier)
	4!a2!a2!c[3!c]	(Identifier Code)
Option B	[/1!a]/[34x]	(Party Identifier)
	[35x]	(Location)
Option D	[/1!a]/[34x]	(Party Identifier)
	4*35x	(Name and Address)

PRESENCE

Conditional (see rule C1)

DEFINITION

This field identifies the financial institution which will pay or credit the beneficiary institution.

CODES

In option A, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CN	12..14n	China National Advanced Payment System (CNAPS) Code
ES	8..9n	Spanish Domestic Interbanking Code
FW	without 9 digit code	Pay by Fedwire
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code

RT		Pay by Real Time Gross Settlement
SC	6!n	UK Domestic Sort Code
ZA	6!n	South African National Clearing Code

CODES

In option D, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CH	6!n	CHIPS Universal Identifier
CN	12..14n	China National Advanced Payment System (CNAPS) Code
CP	4!n	CHIPS Participant Identifier
ES	8..9n	Spanish Domestic Interbanking Code
FW	9!n	Fedwire Routing Number
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
RT		Pay by Real Time Gross Settlement
RU	9!n	Russian Central Bank Identification Code
SC	6!n	UK Domestic Sort Code
SW	3..5n	Swiss Clearing Code (BC code)
SW	6!n	Swiss Clearing Code (SIC code)
ZA	6!n	South African National Clearing Code

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

When field 57a is not present, it means that the Receiver is also the account with institution.

When one of the codes //FW (with or without the 9-digit number), //AU, //CP, //IN or //RT is used, it should appear only once and in the first of the fields 56a, 57a and 58a of the payment instruction.

When it is necessary that an incoming SWIFT payment be made to the party in this field via Fedwire, US banks require that the code //FW appears in the optional Party Identifier.

When it is necessary that an incoming SWIFT payment be made to the party in this field via real-time gross settlement (RTGS), the code //RT should appear in the optional Party Identifier.

The code //RT is binding for the Receiver. If it is used with option A, it must not be followed by any other information. If it is used with option D, it may be followed by another domestic clearing code.

Option A must be used whenever possible.

Option D must only be used in exceptional circumstances: when the party cannot be identified by a financial institution BIC, when there is a need to be able to specify a name and address, for example, due to regulatory considerations or when there is a bilateral agreement between the Sender and the Receiver permitting its use.

When qualified by a clearing system code or an account number, the use of option D will enable the automated processing of the instruction(s) by the Receiver.

10. Field 58a: Beneficiary Institution

FORMAT

Option A	[/1!a]/[34x]	(Party Identifier)
	4!a2!a2!c[3!c]	(Identifier Code)
Option D	[/1!a]/[34x]	(Party Identifier)
	4*35x	(Name and Address)

PRESENCE

Mandatory

DEFINITION

This field specifies the financial institution which has been designated by the ordering institution as the ultimate recipient of the funds being transferred.

CODES

In option A, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CN	12..14n	China National Advanced Payment System (CNAPS) Code
ES	8..9n	Spanish Domestic Interbanking Code
FW	without 9 digit code	Pay by Fedwire
GR	7!n	HEBIC (Hellenic Bank Identification Code)

HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
RT		Pay by Real Time Gross Settlement
SC	6!n	UK Domestic Sort Code
ZA	6!n	South African National Clearing Code

CODES

In option D, Party Identifier may be used to indicate a national clearing system code.

The following codes may be used, preceded by a double slash '//':

AT	5!n	Austrian Bankleitzahl
AU	6!n	Australian Bank State Branch (BSB) Code
BL	8!n	German Bankleitzahl
CC	9!n	Canadian Payments Association Payment Routing Number
CH	6!n	CHIPS Universal Identifier
CN	12..14n	China National Advanced Payment System (CNAPS) Code
CP	4!n	CHIPS Participant Identifier
ES	8..9n	Spanish Domestic Interbanking Code
FW	9!n	Fedwire Routing Number
GR	7!n	HEBIC (Hellenic Bank Identification Code)
HK	3!n	Bank Code of Hong Kong
IE	6!n	Irish National Clearing Code (NSC)
IN	11!c	Indian Financial System Code (IFSC)
IT	10!n	Italian Domestic Identification Code
PL	8!n	Polish National Clearing Code (KNR)
PT	8!n	Portuguese National Clearing Code
RT		Pay by Real Time Gross Settlement
RU	9!n	Russian Central Bank Identification Code
SC	6!n	UK Domestic Sort Code
SW	3..5n	Swiss Clearing Code (BC code)
SW	6!n	Swiss Clearing Code (SIC code)
ZA	6!n	South African National Clearing Code

NETWORK VALIDATED RULES

Identifier Code must be a registered financial institution BIC (Error code(s): T27, T28, T29, T45).

Identifier Code must be a financial institution BIC. This error code applies to all types of BICs referenced in a FIN message including connected BICs, non-connected BICs, Masters, Synonyms, Live destinations and Test & Training destinations (Error code(s): C05).

USAGE RULES

When the Sender instructs the Receiver to either credit one of several accounts owned by the Sender at an institution specified in field 57a, or transfer funds between two accounts owned by the Sender and serviced by the Receiver, option A must be used to specify the account to be credited and the name of the Sender.

It is strongly recommended that when clearing payments take precedence over book transfer and book transfer is requested, Party Identifier be used to specify the account of the beneficiary.

When one of the codes //FW (with or without the 9-digit number), //AU, //CP, //IN or //RT is used, it should appear only once and in the first of the fields 56a, 57a and 58a of the payment instruction.

When it is necessary that an incoming SWIFT payment be made to the party in this field via Fedwire, US banks require that the code //FW appears in the optional Party Identifier.

When it is necessary that an incoming SWIFT payment be made to the party in this field via real-time gross settlement (RTGS), the code //RT should appear in the optional Party Identifier.

The code //RT is binding for the Receiver. If it is used with option A, it must not be followed by any other information. If it is used with option D, it may be followed by another domestic clearing code.

Option A must be used whenever possible.

Option D must only be used in exceptional circumstances: when the party cannot be identified by a financial institution BIC, when there is a need to be able to specify a name and address, for example, due to regulatory considerations or when there is a bilateral agreement between the Sender and the Receiver permitting its use.

When qualified by a clearing system code or an account number, the use of option D will enable the automated processing of the instruction(s) by the Receiver.

When Chinese characters are necessary and when use is bilaterally agreed, the Chinese Commercial Code e-table and guidelines must be followed as published in www.swift.com > Standards > Document centre > Market Practice > Chinese Commercial Code eTable Information.

11. Field 72: Sender to Receiver Information

FORMAT

6*35x (Narrative Structured Format)

The following line formats must be used:

Line 1	/8c/[additional information]	(Code)(Narrative)
	//additional information]	(Narrative)
	or	or
	[/8c/[additional information]]	(Code)(Narrative)

PRESENCE

Optional

DEFINITION

This field specifies additional information for the Receiver.

CODES

One or more of the following codes may be used in Code, placed between slashes ('/')

ACC	Account with institution	Instructions following are for the account with institution.
BNF	Beneficiary	Information following is for the beneficiary.
INS	Instructing institution	The instructing institution which instructed the Sender or previous institution in the transaction chain, to execute the transaction.
INT	Intermediary institution	Instructions following are for the intermediary institution.
PHON	Telephone	Please advise account with institution by phone.
PHONBEN	Telephone Beneficiary	Please advise/contact beneficiary/claimant by phone.
PHONIBK	Phone Intermediary	Please advise intermediary by phone.
TELE	Telecommunication	Please advise the account with institution by the most efficient means of telecommunication.
TELEBEN	Telecommunication	Please advise the beneficiary/claimant by the most efficient means of telecommunication.
TELEIBK	Telecommunication	Please advise the intermediary by the most efficient means of telecommunication.
TSU	Trade Services Utility transaction	The code placed between slashes ('/') must be followed by the TSU transaction identifier, a slash ('/'), the invoice number, a slash ('/') and the amount paid.

NETWORK VALIDATED RULES

If the first six characters in line 1 contain the character string /REJT/ or /RETN/, then it is mandatory to follow the *Payments Reject/Return Guidelines* described in the *Standards MT Usage Guidelines* (Error code(s): T80).

USAGE RULES

Field 72 must never be used for information for which another field is intended.

Each item of information contained in this field must be preceded by a code which specifically indicates the party for which it is intended.

Codes must be placed between slashes and at the beginning of a line. Additional explanatory information, which may be continued on the next lines, is preceded by a double slash '//'.

Narrative text that is not qualified by a code, must start with a double slash '/' on a new line, and, should preferably be the last information in this field.

It is strongly recommended to use the standard codes. However, where bilateral agreements covering the use of codes in this field are in effect, the code must conform to the structure of this field.

Use of field 72, particularly with uncoded instructions, may cause delay, because in automated systems, the presence of this field will normally require manual intervention.

This field may contain ERI to transport dual currencies, as specified in the chapter entitled "Euro-Related Information (ERI)" in the *Standards MT General Information*.

In order to comply with the EC-directive on cross border credit transfers, the optional code EXCH may be used to transport an exchange rate. In line with ERI, the code EXCH is placed between slashes, followed by the exchange rate, format 12d, and terminated with another slash.

The code INS may be repeated to specify all previously involved financial institutions in the transaction chain.

Instructing institutions should be indicated in the order in which they were involved in the transaction chain, that is, the first occurrence specifies the financial institution that received the instruction from the ordering institution and passed it on to the next institution in the transaction chain; the last occurrence always indicates the institution that instructed the sender of this message to execute the transaction.

If codes INS, ACC, or BNF are present in field 72 of a received message, then these codes and the related details must be passed, unchanged, in field 72 of the subsequent message in the payment chain. Additional codes and details may be added to field 72 of the subsequent message but the original INS, ACC and BNF and related details must not be altered or removed.

MT 202 Examples

Example 1: MT 202 with Time Indication

Narrative

On 5 January, a CLS settlement member (BANKGB2L) receives an instruction from CLS Bank to fund JPY 5,000,000 by 07.00 AM CET to CLS Bank.

BANKGB2L sends an MT 202 to their JPY nostro correspondent (BANKJPJT), indicating that the funds need to be credited to CLS Bank by 07.00 AM CET.

Information Flow

SWIFT Message

In the MT 202 which BANKGB2L sends to its JPY correspondent BANKJPJT, it can indicate the time by which BANKJPJT has to credit the funds to CLS bank as follows: :13C:/CLSTIME/0700+0100

whereby

- 0700 is the time by which the funds have to be credited to CLS Bank. By convention CLS time instructions are quoted in CET.
- +0100 is the offset (during wintertime) of CET against UTC.

Upon receipt of the MT 202, BANKJPJT can recalculate the CET time indication into its local time by comparing the offset in 13C to its own offset against UTC. Japan is UTC +0900, therefore BANKJPJT knows it has to process the instruction before 15.00 local time in Japan.

Offsets of local delta time zones against UTC are published in the BIC Directory download file (TZ***.txt file), which is available on www.swiftrefdata.com.

Explanation	Format
Sender	BANKGB2L
Message Type	202
Receiver	BANKJPJT
