

ISO 20022 end of coexistence: 1 month to go. What do you need to know?

The webinar has not
begun, you are all on mute

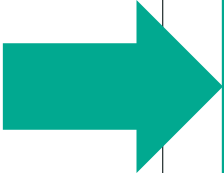

09:00 BST - 10:00 CEST - 16:00 SGT
15:00 BST - 16:00 CEST - 10:00 EST

Confidentiality:
Restricted/External

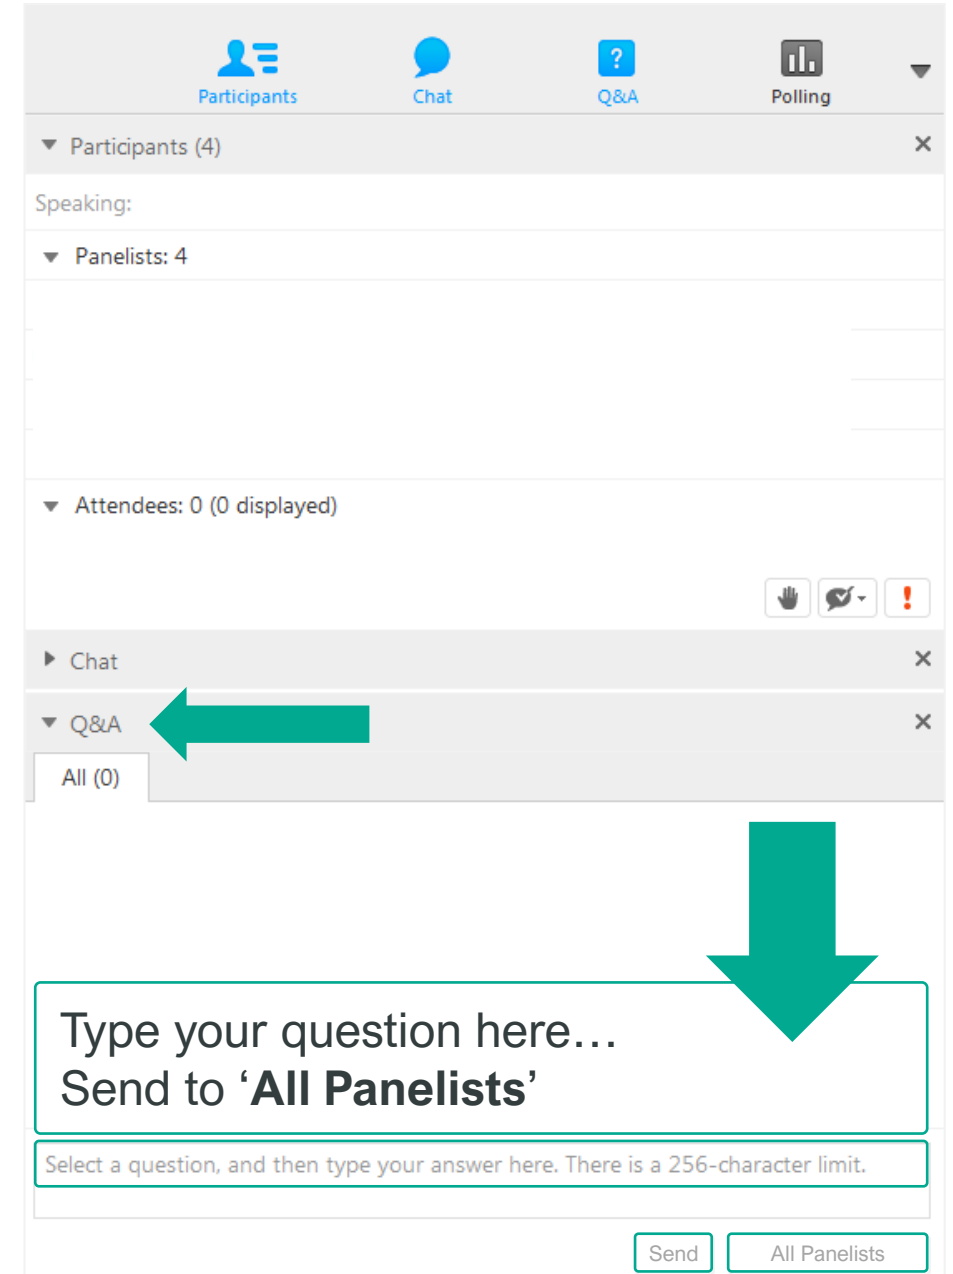

October 2025
ISO 20022 end of
coexistence - 1
month to go

Remember

1. Your phone is on mute
2. Submit your questions using the **Q&A window**
3. Questions may be submitted at any time to **All Panelists**
4. Q&A session at the end of the presentation

The copy of the presentation and
recording will be posted on [swift.com](https://www.swift.com)
[Past webinars overview | Swift](#)

The screenshot shows a webinar interface with a top navigation bar containing icons for Participants, Chat, Q&A, and Polling. Below this, there are sections for Participants (4), Panelists (4), and Attendees (0). The Q&A section is highlighted with a teal arrow pointing to it. The Q&A window is open, showing a text input field with the placeholder text "Type your question here... Send to 'All Panelists'". Below the input field is a smaller text box with the instruction "Select a question, and then type your answer here. There is a 256-character limit." and two buttons: "Send" and "All Panelists". A large teal arrow points down towards the Q&A input field.

October 2025
ISO 20022 end of
coexistence - 1
month to go

Agenda

1. ISO 20022 adoption status – where do we stand?
2. What to do if you are not ISO 20022 ready?
3. What to do if you are ISO 20022 ready?
4. How to prepare for the end of coexistence weekend

The top 3 questions we receive from you....

We're not ready, do we need to subscribe for conversion processing?

What does "deprecated" mean?

What is the timeline for other messages?

Note:
The table focuses on end-of-coexistence dates for FI-to-FI MT messages and their corresponding ISO messages.
Some CPBR+ ISO messages like pain.002 and camt.025 have no MT equivalent and therefore do not appear in this table

Removed = NAK’ed by the network

Retired = Not removed, but should no longer be used for its current purpose (e.g. E&I/SRP)

What will happen in November 2025 ?

As of November 2025, all payment instructions must be exchanged in ISO 20022
A temporary last-resort contingency plan is being readied

October 2025
ISO 20022 end of
coexistence - 1
month to go

Swift Contingency Capability

NEW

For low volumes of MT sent *

Conversion Service

for senders of MT instructions

**MT → ISO 20022 conversion
where possible**

Messages in scope

MT103	pacs.008/004/002
MT103 STP	pacs.008
MT200	pacs.009
MT202	pacs.009/004/002
MT202 COV	pacs.009 COV/004/002
MT205	pacs.009/004/002
MT205 COV	pacs.009 COV/004/002

**Small volume of MT instructions sent only*

**Users will face operational, business and transparency impact
Charges will apply for the messages in scope from Jan 2026**

EXISTING

In-flow Translation

(optional)

for ISO 20022 Receivers

**ISO 20022 → multiformat message
(ISO 20022 with embedded MT)**

Messages in scope

pacs.008	MT103
pacs.008 STP	MT103
pacs.004	MTs 103/202/205/RETN/
pacs.002 negative	MTs 199/299/REJT/
pacs.009	MT202
pacs.009 ADV	MT202 (with fields 53 and/or 54)
pacs.009 COV	MT202 COV

End of Life

**NAK the message to sender
only for FI-to-FI legs**

**Sender must repair and
resend**

Messages in scope

MT102	REMOVED
MT102 STP	REMOVED
MT103 REMIT	REMOVED
MT201	REMOVED
MT203	REMOVED

Swift will NOT have access to details of the instruction to
troubleshoot why the message was unable to be translated.

Charges will apply for messages that are NAKed, as per
existing terms & conditions

Charges subject to rise

What to do if you are ISO 20022 ready?

October 2025
ISO 20022 end of
coexistence - 1
month to go

What do I need to do before the end of coexistence?
If I am fully ISO 20022 ready...

October 2025
ISO 20022 end of
coexistence - 1
month to go

What do I need to do?

I am
fully ISO
20022
ready!

Test that all inbound processing do not need any MT before you opt out of In-flow translation

Opt out of in-flow translation anytime before end 2025 to avoid charges

1 Customer Testing Guidelines

2 Test ISO 20022 flows using the Swift Test Sparring Partner

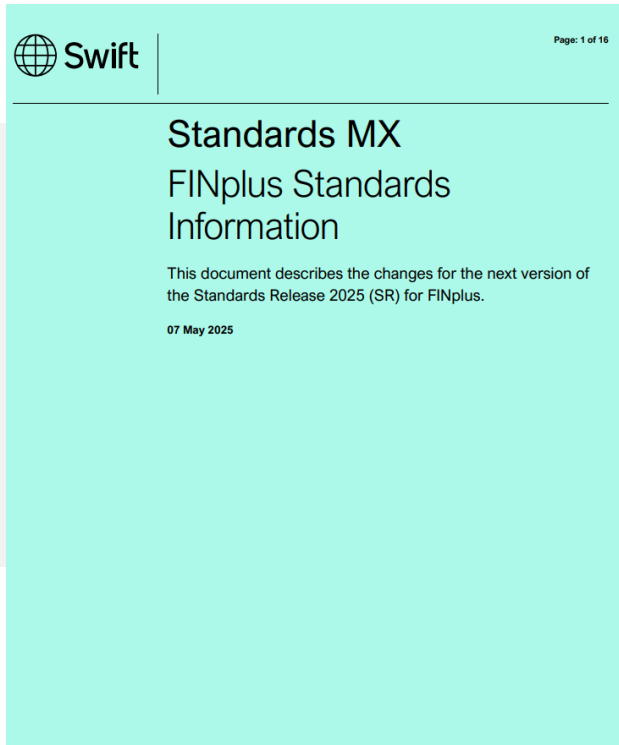

October 2025
ISO 20022 end of
coexistence - 1
month to go

Make sure you are ready : test MX Standards Release 2025

Plan your testing of the new ISO 20022 Standards Release 2025.

The standards release 2024 for CBPR+ messages **will not work after 22nd Nov** without the additional changes coming in SR25 which includes upgrades to the **Usage Identifiers**.

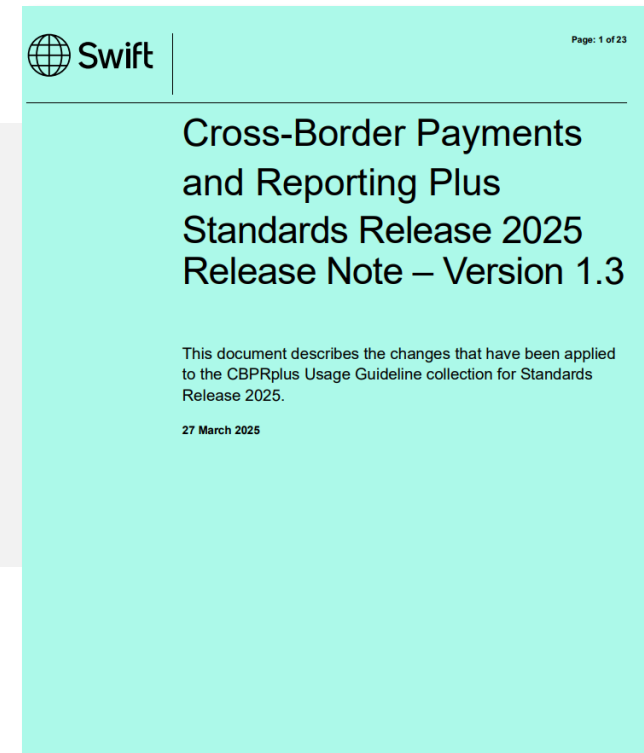

[Download Link](#)

Test all the upgraded
messages in FINplus
pilot future environment
available since July

[Cross Border Payments and Reporting Plus \(CBPR+\)](#) > [Home / Usage Guidelines](#) > [CBPRPlus SR2025](#)

The full list of all CBPR+ messages and Usage Identifiers are also included in the [Release Note](#)

October 2025
ISO 20022 end of
coexistence - 1
month to go

Make sure you are ready : Universal Confirmations

Ensure you're not just ready to send pacs.008, but also able to confirm them

1 Review your GPI and / or Universal Confirmations performance 

2 Investigate root cause for any non-compliant BICs 

3 Check if your system is ready to process pacs.008 messages 

4 Test your confirmation process(es) to ensure readiness 

[Swift Test Sparring Partner](#)

Reminder: opt out of In flow translation service

Deadline: December 2025

October 2025
ISO 20022 end of
coexistence - 1
month to go

The In-flow translation service will become chargeable for payment instruction messages

[Pricing and Invoicing - Price List for Swift Messaging and Solutions.](#)

Those that do not depend on In-flow translation should [opt-out of the service](#) by the latest **15th December 2025** to avoid being charged (Request provisioned in 10 working days)

Important note : In-flow translation will support pain.001 interbank to MT 101 from November 2025. Every Financial Institution will be automatically opted-in this new translation and it will not be chargeable at this point.

October 2025
ISO 20022 end of
coexistence - 1
month to go

Zooming to In-flow translation

Which messages are supported by the In-flow translation service?

Optional In-flow translation for ISO 20022 receivers – messages available

ISO 20022	MT equivalent
admin.024	199 NEW
camt.110	199 NEW
camt.029	196 or 296
camt.056	192 or 292
camt.052	942
camt.053	940

If you are **not ready** with ISO 20022 and plan to send MTs after 22 November 2025

If you **will be ready** with ISO 20022 but see the contingency processing as an **alternate solution** in case of emergency roll-back to MTs

coexistence - 1
month to go

Testing the contingency processing

PREPARE YOUR SYSTEMS

- ☐ Is contingency processing applicable to your organisation?
- ☐ Understand the contingency processing FIN validation rules
- ☐ Ask Swift about risk of NAK in your country
- ☐ Identify the flows at risk, isolate payment engines per region or currency
- ☐ Plan and implement new systems

TEST INTERNALLY

- ☐ Sender: send MTs to yourself in FIN future and pass FIN validation rules with ACK
- ☐ In-flow translation for receiver: confirm that you require the embedded MTs for *all* downstream systems. If not, opt-out from In-flow translation in Pilot
- ☐ Receiver: when sending to yourself, receive ISO 2022 after contingency processing on FINplus pilot future
- ☐ Receiver: use Test Sparring Partner catalogue to validate reception of ISO 2022 with/ without embedded MT

TEST WITH YOUR PEERS

- ☐ Contact peers to plan test schedule
- ☐ **Debtor Agent:** Send payment instructions in ISO 2022 format on FIN future
- ☐ **Intermediary:** ask Debtor Agent to send payment instructions in ISO 2022 format on FIN future
- ☐ Confirm reception of ISO 2022format payments instruction message

ISO 2022
for financial
institutions:
Navigating
the end of
coexistence

Are you prepared for
end of coexistence in
November 2025?
Use our end of
coexistence guide

What will happen in November 2025?
After 22 November 2025, the coexistence period between MT & ISO 2022 ends, and all cross-border payment instructions sent by financial institutions must be exchanged in the ISO 2022 messaging standard.
If you haven't migrated to ISO 2022 by this deadline, payment instructions in scope of the migration still exchanged in MT format may be negatively acknowledged (NAKed) by the Swift network or may incur [additional costs](#) due to the need for [contingency processing messages](#).
If you haven't addressed the changes your institution needs to make, compliance risks going forward.

Checklist

- ☐ 1. Assess which MT payment instruction messages are currently being sent/received by your institution for interbank cross-border payments.
- ☐ 2. For sending MT traffic - understand the additional FIN network validation rules, and check if your systems adhere to the more stringent rules for MT messages. This will facilitate conversion processing. The complete description of the rules is documented under the [Standards Release Guide 2025](#). They appear in the Knowledge Centre within two documents:
 - a. Contingency Processing Network Validated Rules
 - b. Contingency Processing FIN Error CodesTest your MT instructions in Swift's test environment. If your systems don't adhere to the additional validation rules, follow the steps outlined [here](#).
- ☐ 3. For receiving ISO 2022 traffic - ensure that your messaging interfaces are configured to receive and process multiformat ISO 2022 messages that embed an equivalent MT format message. As all institutions will only receive ISO 2022 messages and no payment instructions will be delivered on FIN, this is a must-do prior to November 2025.
- ☐ 4. Test the Swift contingency processing on the FIN Test and Training environment (future mode) and FINplus pilot future environment. You can also test In-flow using the FINplus environment. More information on testing can be found in the [Customer Testing Guidelines](#). Send MT traffic to yourself and receive ISO 2022 messages after contingency processing.
- ☐ 5. Establish operational processes and undertake training to resolve any NAKs or aborted messages (including a process to re-submit these messages).
- ☐ 6. Ensure your operations and technology teams are familiar with how conversion processing and In-flow translation will affect the end-to-end message flows.

ISO 20022 end of
coexistence - 1
month to go

October 2025
ISO 20022 end of
coexistence - 1
month to go

What are the changes occurring on 22nd November 2025 in the general maintenance window?

The general maintenance window is between Saturday 16:00 GMT and Sunday 05:00 GMT

Standards Release 2025 (SR2025) – MT (FIN)

Standards Release 2025 (SR2025) – ISO 20022 (FINplus)

Standards release 2025 changes

ISO 20022 end of coexistence

The coexistence period for the migration to ISO 20022 of cross-border payment instructions exchanged between Financial Institutions (SUPE and/or NOSU categories) is scheduled to end on 22 November 2025. For more information, see [Knowledge Base article 6000054](#).

End of life messages

MT102	REMOVED
MT102 STP	REMOVED
MT103 REMIT	REMOVED
MT201	REMOVED
MT203	REMOVED

Contingency processing for cross-border payment instructions will be activated during Maintenance Window 22-23 November 2025.

Institutions that wish to prevent risk of service disruption due to stricter network validation and avoid additional charges should ensure they do not send FIN/MT instruction messages for cross-border bank-to-bank payments after November 2025. The MT to ISO 20022 conversion capability should be considered a short-term contingency service of last resort.

Contingency activation

MT103	pacs.008/004/002
MT103 STP	pacs.008
MT200	pacs.009
MT202	pacs.009/004/002

See [Customer Testing Guidelines](#)

October 2025
ISO 20022 end of
coexistence - 1
month to go

Performance testing

Validate that your Swift infrastructure and configuration allows you to process your traffic volumes

How can I test?

Based on your volumes, you will send and receive your peak traffic using your test Swift infrastructure to validate that processing time is in line with their business SLAs.

If you want to test you must coordinate with Swift (see [KB Article 2008531](#))

Business Continuity testing

Validate that your Swift infrastructure and configuration allows you to meet your business continuity objectives.

How can I test?

Based on your business continuity objectives and resiliency setup, you will simulate failure in your Swift infrastructure and exercise your business continuity procedures to recover any potential lost messages.

Roadmap of other CBPR+ messages beyond November 2025

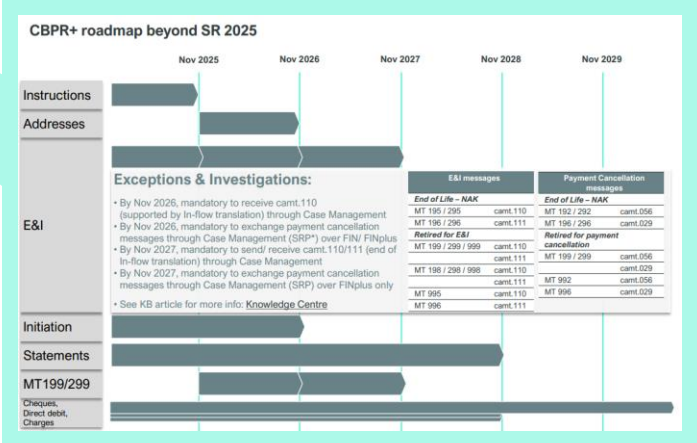

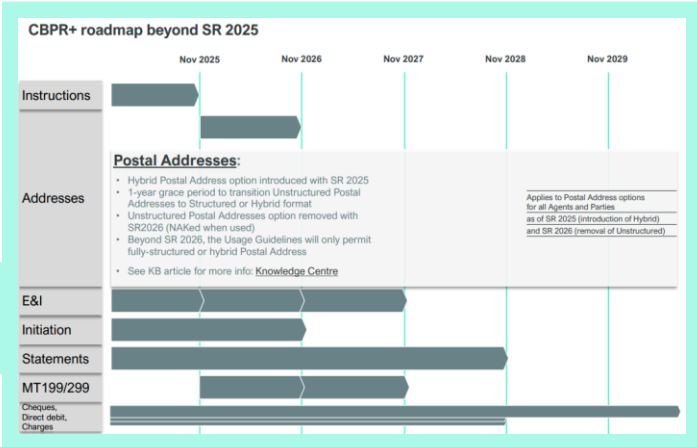

ISO 20022 CBPR+ Roadmap beyond 2025

A new timeline and priorities for the remainder of the messages in scope of the CBPR+ migration is now available.

It proposes target retirement dates for each group of messages and reconciles the priorities expressed by the community. Even though the roadmap spreads across several years, the ambition remains to retire MTs and migrate to equivalent ISO 20022 messages.
